First Chiropractic X-Ray Advancement in Decades

Medlink CDR, Advanced X-Ray Technology

Medlink has expanded our proven straight arm line with a new advanced x-ray system designed specifically for chiropractic care, the Medlink CDR. The Medlink CDR is a smaller more compact system which comes with a variety of features such as full software integration, magnetic lock brakes, 40kw generator, LED collimator, and a removeable grid.

This x-ray solution can fit in virtually any x-ray room as well as drastically cut down installation time reducing clinical downtime.

The VXVUE acquisition software is an award-winning intelligent software solution which utilizes the most advanced imaging processing. VXvue's image viewer program contains specialized modules to acquire, adjust, and manage diagnostic images created by the VIVIX-S Series.

Bucky Enclosure
Features powerful magnetic lock brakes from handle control to raise and lower the system effortlessly. Fully counterbalanced, ultra small footprint solution.
